

IN THE CLAIMS:

Please cancel Claims 1-50 and add new claims 51-103 as follows:

1-50. (Canceled)

51. (New) A camera comprising a main body and a display monitor attached to the main body, said display monitor comprising:

a light emitting layer sandwiched between a cathode and an anode; and

a passivation film formed on said anode,

wherein a halogen element is contained in a portion of said light emitting layer, and

wherein said portion is in contact with said anode.

52. (New) A camera according to claim 51, wherein said halogen element is contained in said anode.

53. (New) A camera according to claim 51, wherein said halogen element is contained in said passivation film.

54. (New) A camera according to claim 51, wherein said portion comprises a region containing the halogen element and a region not containing the halogen element.

55. (New) A camera according to claim 51, wherein said cathode comprises a metal film containing at least one of an alkali metal element and an alkaline earth metal element while said anode comprises a transparent conductive film.

56. (New) A camera according to claim 51, wherein said passivation film is an insulating film containing silicon.

57. (New) A camera according to claim 51, wherein said portion has a thickness of 100 nm or less.

58. (New) A camera according to claim 51, wherein said halogen element is doped through said passivation film.

59. (New) A camera according to claim 51 wherein said camera is a video camera.

60. (New) A camera comprising a main body and a display monitor attached to the main body, said display monitor comprising:

a TFT formed over a substrate;

a light emitting layer sandwiched between an anode and a cathode; and

a passivation film is formed on said anode,

wherein said cathode is electrically connected to said TFT,

wherein a halogen element is contained in a portion of said light emitting layer, and

wherein said portion is in contact with said anode.

61. (New) A camera according to claim 60, wherein said halogen element is contained in said anode.

62. (New) A camera according to claim 60, wherein said halogen element is contained in said passivation film.

63. (New) A camera according to claim 60, wherein said portion comprises a region containing the halogen element and a region not containing the halogen element.

64. (New) A camera according to claim 60, wherein said cathode comprises a metal film containing at least one of an alkali metal element and an alkaline earth metal element while said anode comprises a transparent conductive film.

65. (New) A camera according to claim 60, wherein said passivation film is an insulating film containing silicon.

66. (New) A camera according to claim 60, wherein said portion has a thickness of 100 nm or less.

67. (New) A camera according to claim 60, wherein said halogen element is doped through said passivation film.

68. (New) A camera according to claim 60 wherein said camera is a video camera.

69. (New) A camera comprising a main body and a display monitor attached to the main body, said display monitor comprising:

a light emitting layer sandwiched between a cathode and an anode; and

a passivation film formed on said anode,

wherein at least one of an alkali metal element and an alkaline earth metal element is contained in a portion of said light emitting layer,

wherein said portion is in contact with said cathode, and

wherein said at least one of the alkali metal element and the alkaline earth metal element is doped through said passivation film.

70. (New) A camera according to claim 69, wherein there are a region containing said at least one of the alkali metal element and the alkaline earth metal element and a region not containing the alkali metal element or the alkaline earth metal element in said passivation film.

71. (New) A camera according to claim 69, wherein said portion comprises a region containing said at least one of the alkali metal element and the alkaline earth metal element and a region not containing the alkali metal element or the alkaline earth metal element.

72. (New) A camera according to claim 69, wherein said cathode comprises a metal film containing at least one of an alkali metal element and an alkaline earth metal element while said anode comprises a transparent conductive film.

73. (New) A camera according to claim 69, wherein said passivation film is an insulating film containing silicon.

74. (New) A camera according to claim 69 wherein said camera is a video camera.

75. (New) A camera according to claim 69, wherein said portion has a thickness of 100 nm or less.

76. (New) A camera comprising a main body and a display monitor attached to the main body, said display monitor comprising :

a TFT formed over a substrate;

a light emitting layer sandwiched between an anode and a cathode; and

a passivation film is formed on said anode,

wherein said cathode is electrically connected to said TFT,

wherein at least one of an alkali metal element and an alkaline earth metal element is contained in a portion of said light emitting layer,

wherein said portion is in contact with said anode, and

wherein said at least one of the alkali metal element and the alkaline earth metal element is doped through said passivation film.

77. (New) A camera according to claim 76, wherein there is a region containing said at least one of the alkali metal element and the alkaline earth metal element and a region not containing the alkali metal element or the alkaline earth metal element in said passivation film.

78. (New) A camera according to claim 76, wherein said portion comprises a region containing said at least one of the alkali metal element and the alkaline earth metal element and a region not containing the alkali metal element or the alkaline earth metal element in the vicinities of the interface between said light emitting layer and said cathode.

79. (New) A camera according to claim 76, wherein said cathode comprises a metal film containing at least one of an alkali

metal element and an alkaline earth metal element while said anode comprises a transparent conductive film.

80. (New) A camera according to claim 76, wherein said passivation film is a film containing silicon.

81. (New) A camera according to claim 76 wherein said camera is a video camera.

82. (New) A camera comprising to claim 76, wherein said portion has a thickness of 100 nm or less.

83. (New) A camera comprising a main body and a display monitor attached to the main body, said display monitor comprising:

a light emitting layer sandwiched between a cathode and an anode; and

a passivation film on said anode,

wherein a halogen element is selectively doped to said light emitting layer through said passivation film.

84. (New) A camera according to claim 83, wherein said halogen element is contained in said anode.

85. (New) A camera according to claim 83, wherein said halogen element is contained in said passivation film.

86. (New) A camera according to claim 83, wherein said cathode comprises a metal film containing at least one of an alkali metal element and an alkaline earth metal element while said anode comprises a transparent conductive film.

87. (New) A camera according to claim 83, wherein said passivation film is an insulating film containing silicon.

88. (New) A camera according to claim 83 wherein said camera is a video camera.

89. (New) A camera comprising a main body and a display monitor attached to the main body, said display monitor comprising:

a light emitting layer sandwiched between a cathode and an anode; and a passivation film on said anode,

wherein at least one of an alkali metal element and an alkaline earth metal element is selectively doped to said light emitting layer through said passivation film.

90. (New) A device according to claim 89, wherein said cathode comprises a metal film containing at least one of an alkali metal element and an alkaline earth metal element while said anode comprises a transparent conductive film.

91. (New) A device according to claim 89, wherein said passivation film is an insulating film containing silicon.

92. (New) A camera according to claim 89 wherein said camera is a video camera.

93. (New) A camera comprising a main body and a display monitor attached to the main body, said display monitor comprising:

a layer comprising an organic material between a cathode and an anode; and

a passivation film on said anode,

wherein said layer comprising a first portion and a second portion and said first portion is in contact with said anode,

wherein only said first portion comprises a halogen element, and

wherein at least said second portion functions as a light emitting layer.

94. (New) A device according to claim 93, wherein said halogen element is contained in said anode.

95. (New) A device according to claim 93, wherein said halogen element is contained in said passivation film.

96. (New) A device according to claim 93, wherein said halogen element is doped through said passivation film.

97. (New) A device according to claim 93, wherein said cathode comprises a metal film containing at least one of an alkali metal element and an alkaline earth metal element while said anode comprises a transparent conductive film.

98. (New) A device according to claim 93, wherein said passivation film is an insulating film containing silicon.

99. (New) A camera according to claim 93 wherein said camera is a video camera.

100. (New) A camera comprising a main body and a display monitor attached to the main body, said display monitor comprising:

a layer comprising an organic material between a cathode and an anode; and

a passivation film on said anode,

wherein said layer comprising a first portion and a second portion and said first portion is in contact with said anode,

wherein only said first portion comprises at least one of an alkali metal element and an alkaline earth metal element,

wherein at least said second portion functions as a light emitting layer, and

wherein said at least one of the alkali metal element and the alkaline earth metal element is doped through said passivation film.

101. (New) A camera according to claim 100, wherein said cathode comprises a metal film containing at least one of an alkali metal element and an alkaline earth metal element while said anode comprises a transparent conductive film.

102. (New) A camera according to claim 100, wherein said passivation film is an insulating film containing silicon.

103. (New) A camera according to claim 100, wherein said camera is a video camera.
